INSTALLATION TIPS

- **Two person installation:** Use two or more people to move and install the appliance. Failure to do so can result in back or other injury.
- **Freestanding design:** This appliance is designed to be freestanding only, and should not be recessed or built-in.
- **Floor surface:** This appliance must be properly positioned on a dry, sturdy, level surface that is strong enough to support it when it is fully loaded.
- **Ambient temperature:** The ambient temperatures must correspond to the climate class (T) indicated on the rating plate of the appliance: 16°C – 38°C
- **Clearances:** Ensure that air can circulate freely around the back of the cabinet, which is necessary to cool the compressor and condenser. Allow at least 15cm clear space at the back, 20cm at the sides of the unit and 20cm between the top and any surface above (i.e. a bench top). If you are installing your bar fridge next to a fixed wall, leave sufficient space on the hinge side to allow for the door to swing open.

Please refer to your *User Manual Pages 12–13* for detailed instructions.
